# RICE INDUSTRY

## OPTICAL SORTING SOLUTION

HIGH OUTPUT RESOLUTION HIGH PRECISION INTELLIGENCE

HIGH QUALITY RICE · TECHIK INTELLIGENCE

TECHIK INSTRUMENT (SHANGHAI) CO., LTD

## HIGH-QUALITY RICE IS THE VITAL SOURCE AND FOUNDATION FOR RICE ENTERPRISES COMPETITIVENESS

Vigorously promote agricultural mechanization and intelligence, and plug the wings of science and technology into agricultural modernization.

Established in 2008, Techik Instrument (Shanghai) Co., Ltd. (hereinafter referred to as Shanghai Techik) is a high-tech enterprise focusing on research and development of spectrum online detection technology and product. Its products cover the fields of dangerous goods detection, foreign body detection, substance classification and sorting, etc. . Through the application of multi-spectrum, multi-energy spectrum, and multi-sensor technology, it provides efficient solutions for industries such as public safety, food and drug safety, food processing and resource recovery.

Relying on its profound technical research and development strength, Shanghai Techik owns more than one hundred kinds of intellectual property rights, and has successively won many honorary titles such as Shanghai Specialized and Special New Enterprise, Shanghai Small Giant Enterprise, Shanghai Xuhui District Technology Center.

Shanghai Techik has three holding subsidiaries, has established service organizations and sales offices covering Chinese market, and has service organizations and agency partners in more than 50 countries and regions around the world, to provide customers with technical support and after sales service.

Shanghai Techik adheres to the corporate mission of "making life secure and quality". Continuously improve around customer needs and improve customer experience; Take the striver as the foundation, dedicate to innovation and continuously create value. Shanghai Techik is committed to growing into a globally competitive supplier of intelligent high-end inspection equipment and solutions.

# LEADING-EDGE TECHNOLOGY

## FULL SPECTRUM

### VISIBLE LIGHT

Visible light is the part of the electromagnetic spectrum that the human eye can perceive. The visible light technology uses the difference in the optical properties of rice to distinguish subtle chromatic aberrations and distinguish discolor and defect.

### INFRARED LIGHT

Infrared (IR) frequency is between microwave and visible light, which is an invisible light. Infrared technology expands the range of material sorting and can identify malignant impurities such as plastic, metal, and glass.

### COMPENSATION LIGHT

The light compensation technology can fill light in real time according to material sorting requirements and changes in the environment, greatly improving the ability to recognize subtle defects and yellowish.

# SORTING SOLUTIONS

## MALIGNANT IMPURITIES SORTING

Common malignant impurities can be sorted out, for example: glass, plastic, ceramic, cable tie, metal, insect, stone, mouse droppings, desiccant, thread, flake, heterogeneous grain, seed stone, straw, grain hull, grass seeds, crushed buckets, paddy, etc.

## DISCOLOR SORTING

## DISEASE RICE SORTING

## THE SHAPE SORTING

# SOFTWARE ADVANTAGES

## FRIENDLY INTERACTIVE INTERFACE

- Self-developed rice operating software.
- Preset multiple schemes, choose the best to use immediately .
- The default boot guide, the interface is simple and easy to understand.
- Human-computer interaction is simple and efficient.

## INTELLIGENT ALGORITHM

- No manual intervention, deep self-learning.
- Intelligent recognition of subtle differences.
- Fast realization of simple operation mode.

## INTELLIGENT CLOUD CONTROL

- Exclusive APP, real-time control of production line status.
- Remote diagnosis, online sorting problem solving.
- Cloud backup/download color sorting parameters.

## HARDWARE ADVANTAGES

### SHORTWAVE INFRARED INGAAS CAMERA

Using indium gallium arsenide (InGaAs) material, it has the advantages of high sensitivity and high resolution, and can accurately identify glass, desiccant, plastic, stone and other malignant impurities. Dual infrared cameras can detect other more complex foreign materials.

### NEAR INFRARED (NIR) CAMERA

Near-infrared has the advantages of high sensitivity and high contrast, and can identify most bands of stone minerals, metal, glass, plastic particles and other malignant impurities.

### FULL COLOR CCD CAMERA

Using 5400 pixel full-color sensor, high-resolution recognition and reduction of the subtle color difference of the material, it can effectively sort the different colors of rice, such as whole chalky, core chalky, chalky, milky chalky, yellowish, back line rice, black gray, etc..with algorithm setting, it is possible to distinguish particles of size, shape, and even different physical characteristics.

## MILITARY QUALITY SOLENOID VALVE

### SENSITIVITY

High-speed response to the color sorter control system commands, promptly drive solenoid valve to eject high-pressure air-flow, blowing defects material into rejecting hopper

### LONGEVITY

Military quality solenoid valve; effective protection technology reduces solenoid valve tear; long working life; low failure rate; low power consumption; and prolonged working life of the whole machine.

### PRECISION

The high-resolution camera combines intelligent algorithms to accurately locate defect objects, and the high-frequency solenoid valve immediately open the air-flow switch, so that the high-speed airflow can accurately remove the defect objects.

### STABILITY

The dust extraction system and anti-breakage system effectively reduce the disturb of dust and powder on the running color sorter. The low-power, high-quality solenoid valve ensures a stable and efficient color sorting effect.

**HIGH QUALITY RICE  
FROM HIGH QUALITY SORTING  
EQUIPMENT**

# 1

## TCS-GR Series

### RICE COLOR SORTER

Standard Edition

- Equipped with a resolution 5400 pixel full-color sensor, high-resolution snapshot function, perfect restoration of the true color of the material, 8 times magnification of photos, ultra-high-speed linear scanning speed, improvement of the ability to accurately identify small defects and Yellowish.
- The intelligent multiple-type easy-sorting algorithm system enhances parallel analysis and processing capabilities, with one-key setting of sorting modes, which can realize multiple color independent sorting, normal sorting, reverse sorting, multiple sorting, etc., so eventually achieving the durable and stable sorting with more prominent effect.
- High-brightness LED cold light source, shadowless lighting, to ensure stable and durable lighting environment.

#### TECHNICAL INDEX LIST

Series	Model	Channel Number	Total Power	Voltage	Air Pressure	Air Consumption	Dimension (LxDxH)(mm)	Weight
TCS-GR Series	GR3TXTX-BS	3 × 63	2.0 kW	180~240V 50Hz	0.6~0.8MPa	≤1.8 m <sup>3</sup> /min	1650x1600x2100	520 kg
	GR4TXTX-BS	4 × 63	2.5 kW			≤2.4 m <sup>3</sup> /min	2050x1700x1950	900 kg
	GR5TXTX-BS	5 × 63	3.0 kW			≤2.8 m <sup>3</sup> /min	2350x1700x1950	1050 kg
	GR6TXTX-BS	6 × 63	3.4 kW			≤3.2 m <sup>3</sup> /min	2650x1700x1950	1200 kg
	GR7TXTX-BS	7 × 63	3.8 kW			≤3.8 m <sup>3</sup> /min	3000x1700x1950	1450 kg
	GR8TXTX-BS	8 × 63	4.2 kW			≤4.2 m <sup>3</sup> /min	3300x1700x1950	1650 kg
	GR10TXTX-BS	10 × 63	4.8 kW			≤5.0 m <sup>3</sup> /min	3950x1700x1950	2050 kg
	GR12TXTX-BS	12 × 63	5.3 kW			≤5.4 m <sup>3</sup> /min	4290x1700x2040	2600 kg

Note: 1. This parameter takes gummi as an example (the impurity content is 2%), and the above parameter indicators may vary due to different materials and impurity content.  
2. If the product is updated without notice, the actual machine shall prevail.

## TCS-DR Series

### INTELLIGENT RICE COLOR SORTER

Standard Edition

- Equipped with a high-resolution 5400 pixel full-color sensor, high-resolution snapshot function, perfect restoration of the true color of the material, 8 times magnification of photos, ultra-high-speed linear scanning speed, improvement of the ability to accurately identify little defects.
- The intelligent multiple-type easy-sorting algorithm system enhances parallel analysis and processing capabilities, with one-key setting of sorting modes, which can realize multiple color independent sorting, normal sorting, reverse sorting, multiple sorting, etc., so eventually achieving the durable and stable sorting with more prominent effect.
- High-brightness LED cold light source, shadowless lighting, to ensure stable and durable lighting environment.
- Transparent, plastic and non-metallic particles and particles of different colors, sizes, shapes and even physical properties can be sorted. Infrared sensor has been widely used in color sorting when there is material overlap. After effective perspective, the culled object can be efficiently sorted.
